Professional Summary

Computer Science Graduate from FAST NUCES, Lahore, specializing in AI/ML and full-stack development. Proficient in Python, React, Django, FastAPI, and LangChain, with hands-on industry experience building scalable AI systems, RAG pipelines, and multi-agent workflows. Proven ability to deliver end-to-end solutions from fine tuning LLMs and designing intelligent automation to developing production ready web applications. Passionate about applying cutting edge AI to real world problems and continuously expanding a versatile, high impact technical skillset.

Experience

Mavericks United

May 2025 – Feb 2026

Junior Machine Learning Engineer

Lahore, Pakistan

- Engineered end to end CRM automation pipelines, eliminating manual lead handling across the sales workflow.
- Designed specialized AI agents to streamline operations across distinct business departments.
- Built web scraping systems across 25+ sources for automated lead generation and CRM enrichment.
- Implemented intelligent lead auto-assignment routing based on team member tech stack and experience.

Neuronexus

Jun 2025 – Aug 2025

AI Intern

Remote

- Fine-tuned LLMs using full fine-tuning and QLoRA for domain-specific tasks.
- Built complete ML pipelines (data cleaning, augmentation, training, evaluation) for multiple models.
- Developed AI projects using LangChain, RAG, and LangGraph; configured scalable MCP servers.

Education

FAST-NUCES, Lahore

Sep 2022 – June 2026

Bachelor of Science in Computer Science

Lahore, Pakistan

Punjab College

2019 – 2021

Intermediate (Pre-Engineering)

Sheikhupura, Pakistan

Technical Skills

Languages: Python, C++, JavaScript, SQL, HTML/CSS

Frameworks: React.js, FastAPI, Django, LangChain, LangGraph, RAG, NLP

Tools & Platforms: Git, HuggingFace, FAISS, ChromaDB, Whisper, ElevenLabs, PyTorch, OpenCV

Projects

Sparkle AI – Personalized Learning Platform | *React, TypeScript, FastAPI, MongoDB, LangGraph, ChromaDB*

2026

- Built a full-stack AI learning platform with adaptive content delivery based on user learning styles.
- Designed multiple AI tutor agents (visual, kinesthetic, analogy-based) matched to a 20-question onboarding assessment.
- Enabled users to upload resources and receive answers with precise source attribution via RAG pipeline backed by ChromaDB.
- Built a responsive React frontend with Tailwind CSS and Framer Motion, featuring a ChatGPT style conversational dashboard.

Age & Gender Detection System | *PyTorch, EfficientNet-B3, ResNet-50, OpenCV*

2025

- Fine-tuned EfficientNet-B3 and ResNet-50 on 23K-image UTKFace dataset for simultaneous age and gender prediction.
- Designed a shared-backbone architecture with dual task heads, combining CrossEntropyLoss and Huber Loss to jointly optimize classification and regression.
- Built a soft voting ensemble achieving 94.21% gender accuracy and 4.42 years MAE, surpassing target benchmarks.
- Developed a real-time inference pipeline using OpenCV with temporal smoothing and runtime model switching between architectures.

AI Resume Interviewer | *React.js, FastAPI, Gemini, FAISS, LangChain, Whisper, ElevenLabs*

2025

- Full-stack AI interview platform with real-time voice (STT/TTS via Whisper and ElevenLabs) and text-based interaction modes.
- Used FAISS and LangChain for resume parsing, semantic retrieval, and dynamically personalized interview questioning.
- Integrated JWT-based authentication, session management, and multi-round interview memory for continuous context retention.
- Built a React.js frontend with Material-UI and Framer Motion animations, backed by an async FastAPI architecture with Gemini LLM integration.

Custom CRM System | *React, Flask, PostgreSQL, JWT, RAG*

2026

- Built a full-featured CRM for Mavericks United with role-based access control, hierarchical user management, and JWT-secured authentication, following clean architecture and real-world software engineering best practices.
- Designed lead and team management modules with tracking and assignment workflows, ensuring data integrity, confidentiality, and a responsive, scalable frontend.
- Developed a RAG-based chatbot integrated into the CRM to deliver context-aware help, documentation support, and workflow guidance.
